2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 97 is rejected under 35 U.S.C. 102(b) as being anticipated by Niwa et al ('431).

With respect to independent claim 97, Niwa et al ('431) plainly shows computer code that is at least residing in a processor that produces data from scattered laser radar returns and that stores such data. Please note that Niwa et al ('431) does mapping. Also, please note that the residing of computer software or code in a processor meets the limitation of residing on a computer-readable medium since code or software in a computer or processor is inherently stored in some medium. Please especially note the abstract and Figure 1 of Niwa et al ('431).

4. Claim 112 is rejected under 35 U.S.C. 102(b) as being anticipated by Serbin ('306).

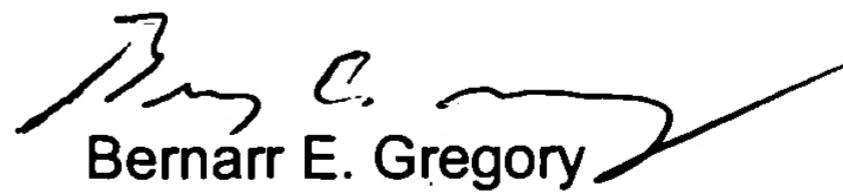

With respect to independent claim 112, Serbin ('306) plainly shows computer-implemented processing of radar mapping, receipt of mapping data, and the application of a “migration algorithm.” Also, please note that the residing of computer software or code in a computer or processor meets the limitation of

residing on a computer-readable medium since code or software in a processor is inherently stored in some medium. Please especially note the abstract and Figure 1 of Serbin ('306).
